## UI/UX Designer

### About Me

I am a UI/UX Designer focused on delivering valuable and intuitive experiences to the humans that use digital products. Design thinking and human-centered design are at the core of my design principles.

Personas

Journey Mapping

Accessible Design

Emotional Design

Design Thinking

Human Centered Design (HCD)

Human-Computer Interaction (HCI)

#### Soft Skills

Strong Work Ethic

Communication

Teamwork

Critical Thinking

### Certifications

I've received certifications by completing courses from the **Interaction Design Foundation**. Some certifications include:

- Agile Methods for UX Design
- Design Thinking: The Ultimate Guide
- Emotional Design - How to Make Products People Will Love
- Interaction Design for Usability

### Recent Work Experience

**June 2019 - Present**

**International SOS**

UI/UX Designer

- Used UI/UX principles to solve user problems, provide value, and create engaging experiences.
- Created a design system to unify product experiences in the digital suite. The design system embodies atomic design principles and synergises a consistent way of working and component usage with developers.
- Established design tokens which feed into the design system, in order to centralise changes to atoms, molecules, etc.
- Served as a design lead to deliver new products and features alongside product management and technical teams.
- Leveraged design-thinking methods with team members to develop user empathy, ideate solutions, and create prototypes that align with user goals.
